The project is made using java programming language and XML.

It is a very simple program . It open with taking four inputs from the user Name, Date of Birth,NID,Blood Group. I implement a new layout called tab layout Which has three items Basic University Affiliation and Numbers .

The screenshot shows a mobile application interface with a dark theme. At the top, there is a status bar with the time 5:19 and various icons. Below the status bar is a header bar with the text "uniclubz". Under the header bar is a tab layout with three tabs: "BASIC", "UNIVERSITY AFFILIATION", and "NUMBERS". The "BASIC" tab is selected and highlighted with a blue underline. Below the tabs, there are four input fields with labels: "name", "date_of_birth", "nid", and "blood_group". At the bottom of the screen, there is a navigation bar with three icons: a home icon, a square icon, and a back icon.

The University Affiliation is able to take multiple entries. The entries are taken in multiple small fragments and can add upto three fragments which appear on a click of a FAB.

5:19 57%

uniclubz

BASIC UNIVERSITY AFFILIATION NUMBERS

Home/office/Other/Cust

SUBMIT phonenumber +

Home/office/Other/Cust

phonenumber +

Home/office/Other/Cust

phonenumber +

The thrid tab item has also able to take multiple phone numbers as well.

5:19 57%

uniclubz

BASIC UNIVERSITY AFFILIATION NUMBERS

Home/office/Other/Cust

SUBMIT phonenumber +

Home/office/Other/Cust

phonenumber +

Home/office/Other/Cust

phonenumber +

On the clicking the submit button the information is supposed to be carried over to a recycle view and be displayed.

This time project also used room data base ,where we will pull data from repository .
